

ARMORITE®

CHOCKY BARS

ASGCO®
Complete Conveyor Solutions

ASGCO® **Armorite®** is an extremely hard, laminated bi-metallic, wear resistant composite, which has a nominal hardness of 700 BHN (63Rc) produced by combining a highly alloyed chromium-molybdenum white iron (to AS 2027 15/3 Cr/Mo) and metallurgically bonding it to a mild thick steel backing plate. The resultant bond possesses high shear strength of over 250 Mpa and will not separate.

Armorite® Chocky Bars offer protection on contoured surfaces such as chute linings, buckets, loaders, excavators and dragline machines.

- Easy formation to convex or concave surfaces with the notched mild steel backing plate
- No pre-heating or post-heating required when welding bars in place
- Cost effective method for protecting your equipment
